Quality Policy

At Swissci, we design, manufacture, and supply high-quality innovative products for the laboratory, to support the global research and development market.

We continue to expand and develop our product range often in collaboration with key technological institutes.

It is Swissci's policy to manufacture and supply high quality products that consistently satisfy our customer needs. We have set Quality Objectives which are compatible with our strategic direction and are embedded into our Quality Management System.
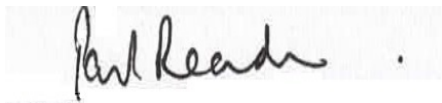

Our Quality Management System fully supports ISO 9001:2015 standards which provides a robust framework to enable us to measure our performance and the effectiveness of our operation.

Our employees are integral to the success of our Quality Management System and we encourage their contribution.

At Swissci, we are committed to an ethos of continual improvement and recognise the importance of regularly evaluating our performance; ensuring that we consistently achieve the standards set within our Quality Management System.

The application of our Quality Management System enables us to operate at our upmost efficiency and manufacture products to our highest capabilities.

This Quality Policy is communicated to our employees and is made publicly available on our company website.
