

About

Diacon™ is a low volume dialyser for protein solutions of up to 0.5ml.

The Swissci Diacon™ uses specially selected regenerated cellulose membranes for dialysis in a provided floating rack for 2-3 hours.

Product Specifications

- Ready to use, just add sample
- Ideal for small sample volumes up to 0.5ml
- No cross contamination or leakage
- Regenerated cellulose membrane; sulphur and heavy metal free
- Molecular weight cut off of 10,000 Daltons
- Excellent sample recovery without disturbing valuable protein complexes
- Dialysis complete in 2-3 hours
- Gentle and efficient desalting
- Caps to prevent spillage/evaporation
- Floating tube rack provided holds up to 18 Diacon at any one time
- Single use - disposable device; no cleaning required

FACTS

- Regenerated cellulose membrane
- 0.5 ml capacity
- 10kDa MW cut off

FEATURES

- Dialysis in 2-3 hours
- Floating rack included
- Ready to use

Order Information

Item: Diacon 0.5 ml Dialyser

Codes: W72010

Details: Pack of 40
